January 25, 2018

The City of Napoleon will be beginning a street tree trimming project on Thursday, January 25, 2018, and will continue for the next 1-2 weeks. Tawa Tree Service has been contracted by the City to trim all street-side City owned trees (with the exception of a few private trees that interfere with public clearances) on the streets listed below. The streets to be trimmed are as follows:

750 & 756 W. Washington Street
200-500 Blocks W. Washington Street
714 Monroe Street
225 Fillmore Street
818 & 822 Hobson Street
Maple Street - Depot Street to E. Clinton Street
Vocke Street - Fillmore Street to Dead End
E. Clinton Street - Monroe Street to Hobson Street
E. Riverview Avenue - N. Perry Street to Commerce Drive
Lamar Lane - E. Riverview Avenue to Cul-de-sac
Stout Street - E. Riverview Avenue to E. Main Street
Wayne Street - E. Riverview Avenue to E. Main Street (Dead end towards the park)
Jefferson Street - E. Washington Street to E. Front Street
Hobson Street - E. Riverview Avenue to E. Front Street
Monroe Street - E. Riverview Avenue to E. Front Street
E. Washington Street - E. Riverview Avenue to Dead End
E. Main Street - Monroe Street to Stout Street
E. Front Street - N. Perry Street to Jefferson Street
Downtown Tree Pits

Additional Trimming if this list is completed will include areas south of the river.

This is a routine maintenance trim to remove crowded, poorly attached, diseased, dead branches and debris, and to obtain eight (8) foot clearance over sidewalks and fourteen (14) foot clearance over driveways and streets. Some trees may need more work than others and will be done for the safety of the community and its infrastructure as well as the health and future of the urban forest. **We will not be removing any trees in this contract.**

Please take care when driving in these neighborhoods as there may be times where debris and equipment may limit access or partially obstruct the roadway. If you live in these neighborhoods, please try to park on adjacent side streets or in driveways to avoid falling branches and to allow access for the contractor vehicles.

If you have any questions or concerns please contact me at your convenience.

Sincerely,

Martin T. Crossland, P.E.
Staff Professional Engineer
